

Timothy Do

An A.I. Machine Vision Enthusiast & DSP Techie to Make the World A Better Place

EDUCATION

University of California, Irvine — B.S. Electrical Engineering

September 2019 - June 2023 (Expected)

- 3rd Year Undergraduate, Senior Standing
- Overall GPA: 3.90, Major GPA: 3.93
- **Specialization:** Digital Signal Processing (DSP)
- **Research Interests:** DSP with AI, Image Enhancements, Motion Interpolation, and Pixel Manipulation to make media more enjoyable.
- **Relevant Coursework:**
 - Network Analysis (EECS 70B), Discrete Signals (EECS 50), Advanced C Programming (EECS 22)
- **Major Coursework** for Fall 2021: EECS 170A (Semiconductors), EECS 152A (Digital Signal Processing), and EECS 145 (EE Analysis)
- **Clubs and Societies:** IEEE, ZotHacks, Linux User Group
- **Awards:** Dean's Honor List (GPA 3.5+) for six quarters at UCI

EXPERIENCE

UCI Division of Continuing Education - I.T. General Assistant

August 2021 - Present

- Helped Set-Up Desktops, Docks, Webcams, and Computers for over 300+ Employees in UCI's Division of Continuing Education
- Implemented Terminal Graphics (Colors) using Escape Codes
- Worked with Network Administrators by managing IPs, Subnet Masks, and DNS servers of DCE users to access local services in the Network
- Diagnosed various problems users are having (i.e. not connected to the VPN, Monitor is not displaying), and finding solutions to fixing them by employing IT tactics (pinging, searching local devices, etc.)

Boy Scouts of America - Merit Badge Counselor

July 2021 - Present

- Offered to teach three Merit Badge Courses: Programming, Music, and Bugling.
- Taught a Group of 10-12 Scouts the History of Programming, Debugging Practices, IP(s), and assisted them in any programming questions for their Merit Badge Requirements
- Managed the Scout's Requirements by creating Google Forms / Google Sheets for easy submission of their programming work online.
- Outreached to Boy Scout Troop 610 with weekly updates to encourage more scouts to sign up (inclusivity)

PROJECTS

TTLZNetChess - An Advanced Client-Based Chess Application

March 2021 - June 2021

- **Languages Used:** C, Makefile, git
- Managed a team of four developers into develop a C-Based Chess Application (with git & Version Control) for EECS22L (Intro to Software Engineering)
- Implemented Terminal Graphics (Colors) using Escape Codes
- Implemented AIs in Chess using Minimax Algorithm
- Networking Support using standard TCP Ports and FCFS Protocol

SKILLS

Web Programming:

Created Websites with HTML, CSS, and Javascript

Compiler / Object-Oriented Programming:

Experience with C, Java, and Python libraries by creating IoT projects

GPIO Programming:

Used MicroPython or Ino to control circuits digitally with Arduino or Raspberry Pi.

Computers:

Assembled/Debugged Desktop Hardware and OS installations.

CUDA:

Programmed GPUs to do Matrix Multiplications and DSP

HACKATHONS

Cisco Webex Hackathon 2021

Gratition: An Easing Mental Health Web App (with Google Voice Synthesis)

Languages: HTML/CSS/JS

ZotHacks 2021

Anteatings: A Fun JS-Based Antsmashing Game on the Web

Languages: HTML/CSS/JS

LANGUAGES

English (Fluent), **Vietnamese** (Fluent), & **Spanish** (Proficient)
