Hello Timothy,

Congratulations! You have successfully petitioned to become Accelerated Status. Therefore, you can now begin your graduate coursework while still an undergraduate student. If you are offered MS admissions, you may petition to transfer up to 18 units of your MS degree requirements. If units were earned during undergraduate study, a letter from your undergraduate counselor is required stating coursework was not used towards bachelor degree.

If you have time in your undergraduate schedule and choose to take Engineering graduate courses, you will need to follow these instructions to do so. Once you have found an Engineering graduate course that you would like to enroll, please contact the professor of that course (before the quarter begins). You will need to gain written (via email) permission from that professor to enroll in that course. Please forward the approval email from the professor to the Curriculum, Analytical Studies & Accreditation office at casa@eng.uci.edu and be sure to include your name, student ID number, the course number, and the course code. You will be notified when the authorization has been processed and you are able to enroll in that graduate course via WebReg.

If you are admitted and matriculate into a UCI Samueli School of Engineering program for graduate study (which is not a requirement to be a part of this program), you will receive a refund for your graduate school application.

Please feel free to contact our office with any questions you have about these policies or about graduate school, in general.

Thank you and keep up the good work!

Best regards,

Graduate and Professional Studies
